

A, 14. (New) The dumbwaiter of claim 10, further comprising a guide bar adjacent to and parallel with the cylindrical shaft and spaced a distance from the two sheaves, the guide bar adapted to guide the two cables onto or off of the sheaves in a preferred direction.

15. (New) The dumbwaiter of claim 10, wherein the container is of a one-piece construction and adapted to contain a fluid spill.

IN THE SPECIFICATION

Due to the extensive amendments made in the specification, please refer to the appendix entitled Marked Version of the Specification.

Please substitute the specification in the appendix entitled Clean Version of the Specification for the previously filed specification.

Support for the amended specification is found in the various parts of the original specification. Support for identifying the SOMFY HiPro LT50 line of motors for use with the invention is that this line of motors has been available to the art since at least 1996.

REMARKS

Applicant has reviewed and considered the Office Action mailed on June 6, 2001, and the references cited therewith. Applicant has retained the services of patent counsel in preparation of this response.

Claims 1-3 are canceled and claims 4-15 are added; as a result, claims 4-15 are now pending in this application.

§§112 and 1.71(a)-(c) Objection of the Specification

The specification has been amended to reflect the proper arrangement of content. The specification has also been amended to comply with 35 U.S.C. 112 and 37 C.F.R. 1.71, clarifying the subject matter. Support for the amendments is found in the originally filed application. No new matter is believed to be added with these amendments. A
